THE COUNCIL'S CALL

Build Option B, the narrow wedge: hand-match 10 subscription apps with 50 creators, charge a 5% platform fee plus a $1,500 matching fee, and hold the open marketplace, equity stakes, and extra hires until the day-90 gate clears.

Scores

A	Build the full platform as written		2.6
B	**Narrow wedge: one niche, hand-matched**	RECOMMENDED	8
C	Equity-for-distribution managed network		4
D	Don't build it		1

Each advisor scores every option from 1 to 10, weighted by how much their area matters to this decision.

Why the council landed here

- **Alex Hormozi:** A 1% fee cannot build a $1B company. $100M of revenue needs $10B of GMV at 1% but $2B at 5%, so the fee changes first.
- **Alex Hormozi:** Sell apps first, test creator demand in week one, and onboard creators only against signed apps.

Simulated advisors built from each person's public work. They are not the people and do not speak for them.

- **Gary Vaynerchuk:** Colossus is a media company that runs a marketplace: a creator leaderboard and 'I earned $X' clips build the brand and the investor story.

Watch out

Dan Martell: "Will you give up the inbox by day 14?"

For this to be right: Nobody dissented. The plan is wrong if creator traffic does not turn into paid subscribers or if the sanctions and payout desk has no real owner.

What to do next

- **By Fri Oct 23:** Send 100 creator DMs, post the first videos, run the time audit, and post the paid ops test role.
- **By Fri Oct 30:** If 20 of 100 creators say yes, call 30 RevenueCat apps with $10k+ MRR and pitch pay-only-on-sales.
- **Nov 16, Dec 16, Jan 15 2027:** Day-30 fee gate, day-60 conversion check, day-90 scale gate of 10 apps at $50k a month GMV each.
- **Cheapest test:** 100 creator DMs and 30 app calls in two weeks, cost near $0.
- **Kill it if:** Fewer than 3 apps accept any fee by day 30, under 10 paying subscribers per app by day 60, or under half the GMV bar by day 90. Stop and do not build the platform.

Where they fought

- **Can a 1% fee reach $1B?** Hormozi and Gary V said no and wanted 5% to 10%. Martell conceded he had not priced it and added stage math. Resolved as a 5% test plus a matching fee; whether apps accept it is the first gate.
- **Creators or apps first?** Gary V wanted 200 creators first. Hormozi and Martell wanted signed apps. Gary V moved to 200 replies, 50 onboarded against signed apps; Hormozi moved to run the creator test first. Resolved as both, capped.
- **Is equity or fast scale the real upside?**
  Forced by the unanimity check. Hormozi raised C from 3 to 4 and Gary V argued A. Both stayed on B: equity is a kicker on proven winners, and A is B plus gated hiring.
